

## FOR IMMEDIATE RELEASE

### Unity<sup>BPO</sup> is a Proud Partner in National Health IT Week

**Albuquerque, NM – September 27, 2017** – Unity<sup>BPO</sup>, a provider of health care IT services, today announced that they are a Proud Partner in National Health IT Week (October 2-6). National Health IT Week is an awareness week offering all healthcare stakeholders an opportunity to unite under one banner, expressing the benefits that health information technology (IT) brings to U.S. healthcare. “The Value of Health IT.” Comprehensive health care reform is not possible without system-wide adoption of health information technology, which improves the quality of healthcare delivery, increases patient safety, decreases medical errors, and strengthens the interaction between patients and healthcare providers.

Initiated in 2006 by the Healthcare Information and Management Systems Society (HIMSS), National Health IT Week has emerged as a landmark occasion for using health IT as part of the overall solution to improve America’s healthcare as a bipartisan, federally led, market driven initiative.

The Week consists of events across the country, including National Health IT Week participants —vendors, provider organizations, payers, pharmaceutical/biotech companies, government agencies, industry/professional associations, research foundations, and consumer protection groups— all working together to elevate national attention to the advantages of advancing health IT.

View our full list of [partners](#) and updates on the Week’s [events](#). Working together with our growing coalition of stakeholders, Unity<sup>BPO</sup> is helping to transform healthcare for all.
