

FOR IMMEDIATE RELEASE

Unity^{BPO} to Partner with VNSNY in Transitioning to a New EHR and Services Platform

Albuquerque, NM – January 12, 2018 – Unity^{BPO}, a provider of health care IT services, today announced a partnership with The Visiting Nurse Service of New York (VNSNY) to assist with the transition and implementation of their Electronic Health Record (EHR). Unity will provide clinical application managed services as well as deliver our UnityWithin™ Platform, a comprehensive framework for managing enterprise health technology environments.

Unity^{BPO} has clients throughout the United States and specializes in providing clinician and patient engagement, managed, professional, and telehealth services and solutions to health care entities including home health and hospice agencies, physician practices, long-term care, and integrated health care systems.

“We understand the business of home health and recognize that a truly customized approach to each agency’s needs is the best way to ensure that providers and clinicians achieve both patient satisfaction and agency productivity goals,” said Unity^{BPO} CEO, Stephen V. Wade. “We believe VNSNY’s investment in a robust EHR will significantly enhance the quality of care in serving the people of the 5 boroughs of New York. We are proud to partner with the IT team at VNSNY. Together, we will help VNSNY clinicians use technology to care for their patients and minimize disruption during this complicated transition.”

“We are pleased to have partnered with Unity^{BPO},” said Michael Orlando, Director of IT Services for The Visiting Nurse Service of New York. “We are able to see that the knowledge they bring will make this transition easy for our clinicians and allowing us to focus on other innovations within our IT offerings to better serve our clinicians and patients.” The two organizations have been collaborating on the partnership in preparation for the transition for several weeks.

About Unity^{BPO}

Serving over 100,000 clinicians in over 35 states, Unity^{BPO} is the premier homehealth/hospice technology company. Unity^{BPO} creates value for Home Health agencies by reducing costs while dramatically improving dedicated patient time. Our remote support model allows field clinicians to learn and use their EHR on the spot, as they progress from visit to visit. Our clinical/technical services are unique in the Home market, providing agencies with turnkey EHR, clinical and technical support solutions and services that will optimally manage the total technology enterprise. Our day-to-day HIT operations ensure patients, providers, and administrators alike experience a more efficient approach to using technology within Healthcare. Learn more at www.UnityBPO.com.

About The Visiting Nurse Service of New York

The Visiting Nurse Service of New York (VNSNY) is the largest not-for-profit home health care organization in the United States, serving the five boroughs of New York as well as Westchester, Nassau and Suffolk counties. VNSNY's programs are designed to help patients improve their quality of life, and to reduce the number and length of hospitalizations. VNSNY offers a comprehensive array of home-and community-based programs to meet the diverse health and personal care needs of its patients, improve the quality of life, and reduce the number and length of hospital stays. On any given day, VNSNY has more than 35,000 patients in its care.
